DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group III, claims 36-40 & 45-48 in the reply filed on April 6, 2005 is acknowledged. Claims 20-35, 41-44 & 49-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), there being no allowable generic or linking claim. Election was made without traverse in the reply filed on April 6, 2005.

Allowable Subject Matter

Claims 37-40 & 47-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 37-40 would be allowable over the prior art of record, because the prior art is silent to a battery-powered device comprising a coiled spring contact comprising a plurality of concentric windings contiguous with an upper end turn with a terminal contact point laterally offset from an axis of rotation defined by the windings.

Application/Control Number: 10/667,531

Art Unit: 1746

Claim 47 would be allowable over the prior art of record, because the prior art is silent to a coiled spring contact comprising a plurality of concentric windings, wherein the rupturing means comprises at least one bend in an upper turn of the coiled spring contact, each bend having an apex facing into the battery compartment to define at terminal contact point.

Claim 48 would be allowable over the prior art of record, because the prior art is silent to a coiled spring contact comprising a plurality of concentric windings defining an axis of rotation, wherein the scarping means comprises a bend on an upper turn of the coiled spring contact laterally offset from the axis of rotation, the bend having an apex facing into the battery compartment to define a terminal contact point.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

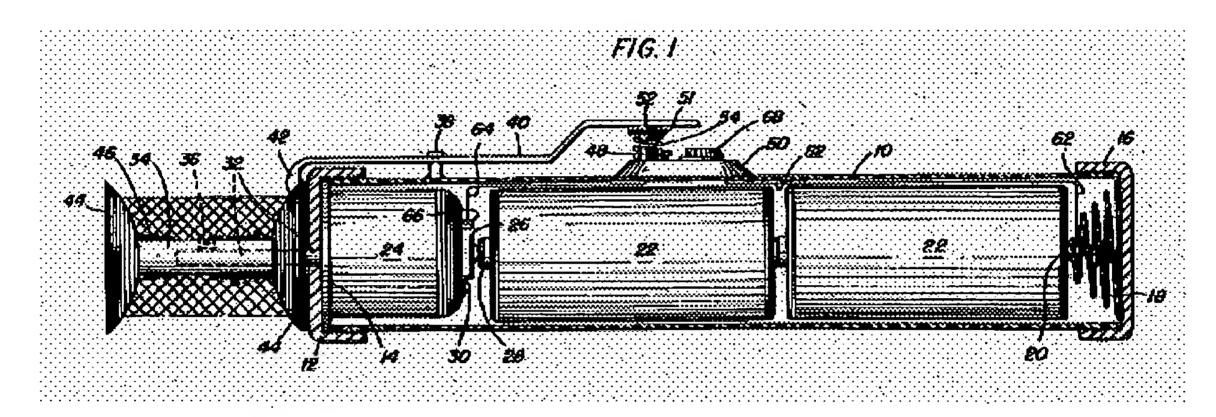

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/667,531

Art Unit: 1746

Claims 36 & 45-46 are rejected under 35 U.S.C. 102(b) as being anticipated by W.E. Reed et al. U.S. Patent 2,896,875.

With respect to claims 36 & 46-46, Reed teaches a battery-powered device

(See figure 1) comprising coiled spring contact (18) disposed in compartment (10). With respect to claims 36 & 46, the limitation with respect to scraping away a portion of an insulating contaminant layer from a surface of an abutting terminal of an installed battery is considered an inherent characteristic of the spring contact (18), because the spring contact is capable of performing said function. As to claim 45, the limitation with respect to means for rupturing an insulating contaminant layer on a localized region of an abutting battery terminal surface, is considered an inherent characteristic of the spring contact (18), because the spring contact is capable of performing said function. Therefore, the instant claims are anticipated by Reed.

Art Unit: 1746

Conclusion

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Monique Wills whose telephone number is (571) 272-1309. The Examiner can normally be reached on Monday-Friday from 8:30am to 5:00 pm.

If attempts to reach Examiner by telephone are unsuccessful, the Examiner's supervisor, Michael Barr, may be reached at 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through
Private PAIR only. For more information about the PAIR system, see
http://pair-direct.uspto.gov.Should you have questions on access to the
Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
